Introduction

COVERAGE

This is Volume 1 of the two-volume series. It covers materials — including monographs, conference proceedings, and theses — that relate to film studies in and about mainland China published between 1920-2003. Volume 2 will cover materials related to Taiwan and Hong Kong. Books relating to both mainland China and Taiwan or Hong Kong will be included in both Volume 1 and Volume 2.

Journal articles are not included.

Chinese translations of works in other languages and not related to Chinese film studies are not included.

ENTRIES

Each entry includes the entry number, author, title, publication, ISBN, series title, note, and language code.

All Chinese entries have both romanized and Chinese character entries for author, editor, and title. The use of traditional or simplified Chinese characters for each Chinese entry depends on the characters used in the original materials. Where English translations of titles are included, the translations appear exactly as given in the original Chinese book. Works in other languages have only standard romanized entries.

Example 1:

0021

Li, Suyuan.

酃苏元。

Dian ying chang yong ci yu quan shi.

电影常用词语诠释。

Beijing: Gao deng jiao yu chu ban she, 1985.

139 p.

Series title: Zhongguo dian ying yi shu cong shu

中国电影艺术丛书

Note: Includes 72 film terms and explanations.

Chi

Within each section, entries are listed alphabetically according to the first line.

Following Anglo-American Cataloging Rules, Second Edition (AACR2), the author will be listed first (see above example), unless there are more than three authors listed.

When there are two or three authors for the same work, only the first author will appear on the first line.

The title will be listed first when there is no author, when there are more than three authors, or when there is only an editor. In such cases, the principle author or editor (if any) will be listed after the title in the following fashion.

Example 2:

0005

Zhong wai ying shi ming zuo ci dian / Li Hengji deng zhu bian.

中外影视名作词典 / 李恒基等主编。

Beijing: Guo ji wen hua chu ban gong si, 1993.

981 p.

ISBN 7800499642

Chi

Each entry is numbered; the number is listed at the beginning of the entry.

If an entry covers more than one subject area, it will appear in all related subject areas.

INDEXES

There are three indexes:

1. The Subject Index is a list of alphabetically arranged subjects and sub-subjects with matching entry numbers.
2. The Author Index is a list of alphabetically arranged individual author, editor, and corporate author names with matching entry numbers.
3. The Title Index is a list of alphabetically arranged titles and parallel titles (such as the translated titles) with matching entry numbers.

LANGUAGE CODE

Chi = Chinese

Eng = English

Fre = French

Ger = German

Ita = Italian

Jpn = Japanese

Kor = Korean
Spa = Spanish
Rus = Russian
Uig = Uigur

ROMANIZATION

The bibliography is arranged according to the Roman alphabet order.

Chinese romanization is based on the Pinyin system and follows New Chinese romanization Guidelines issued by LC (Library of Congress) in 2000 (at <http://www.loc.gov/catdir/pinyin/romcover.html>). This new standard has been adopted by most academic libraries outside China. There are some differences between this Pinyin standard and the official Pinyin standard issued by the Chinese government in 1957. In the LC Pinyin system, in general, a space is placed between each romanized character except in geographical and personal names. For example, the Chinese word for “film” is “dian ying” in the LC Pinyin system, while the Chinese word for “China” is “Zhongguo.”

There are two main reasons for the use of the LC Pinyin standard in this bibliography:

1. Most libraries outside China use the LC standard for their Chinese cataloging, and many still do not have Chinese character display and search functions for their catalogs. For this reason, users have to know the LC Pinyin standard in order to conduct successful searches for Chinese materials through these libraries' catalogs.
2. Most Chinese libraries inside China use Chinese characters instead of Pinyin. The official Pinyin standard thus would not help users who, after reading this bibliography, want to find materials in Chinese libraries according to the Pinyin entries.

SIMPLIFIED AND TRADITIONAL CHINESE CHARACTERS

This bibliography uses both simplified and traditional Chinese characters, depending on the characters used in the original book. The author strongly believes that, as a reference tool, this bibliography should match the original materials as closely as possible.
