Preface	xiii
Introduction	xv
Part 1 CDM as a Regional Cooperative Approach	1
1 Transboundary Environmental Pollution and Cooperation between Japan and China: A Historical Review	3
1.1 Introduction	4
1.2 Energy and environmental policies in China	5
1.3 Environmental concerns in Japan	13
1.4 China's CDM strategy and climate change policy	16
1.5 Conclusion	18
2 CDM, Climate Change and Sustainable Development: A Methodological Framework for Evaluation	23
2.1 Introduction	23
2.2 Definition, history and institutions of the CDM	25
2.3 CDM, climate change and sustainable development	28
2.4 Sustainable development and CDM approval criteria in host countries	32
2.5 Features of registered CDM projects	37
2.6 Methodological framework for evaluating CDM projects	42
2.7 Concluding remarks	45
3 Domestic or Regional Cooperative Strategy?	49
3.1 Introduction	49
3.2 Dry and wet deposition: from an economics viewpoint	53
3.3 Empirical analysis	55
3.4 Policy implications	56
3.5 Conclusion	60

4	China-Japan CDM: Realizing Regional Environmental Benefit?	63
4.1	Introduction	64
4.2	Incentives for Japanese entities	66
4.3	Barriers inherent to the CDM institution	67
4.4	Barriers accrue to policies in China	72
4.5	Conclusion	80
Part 2 A Preliminary Economic Analysis of the CDM Potentiality in China		85
5	CDM's Potential in China: An Analysis Using the GTAP-E Model	87
5.1	Introduction	87
5.2	Outline of the GTAP-E model	88
5.3	Simulation analysis	92
5.4	Concluding remarks	96
6	China's Energy Balance and CO ₂ Emissions: An Energy Balance Model Approach	99
6.1	Introduction	99
6.2	Fact finding for China's energy balance	100
6.3	Building China's energy balance model	104
6.4	Forecast and simulation analysis	110
6.5	Conclusion	126
	Appendix: China's energy balance model	126
7	Dynamic Effects of a CDM Project: A Multi-Sectoral Econometric Model of China	141
7.1	Introduction	141
7.2	Outline of the multi-sectoral econometric model of China	142
7.3	Estimation results of the model and its performance	153
7.4	Baseline forecast	156
7.5	Concluding remarks from the scenario analysis	159
Part 3 Evaluations of CDM Projects in China		165
8	Site Location of CDM Projects in China: An Input-Output Analysis	167
8.1	Introduction	167
8.2	Economic and environmental effects of CDM projects in the construction phase	170
8.3	Spillover rate of innovation	176
8.4	Net environmental effects of CDM projects	180
8.5	Concluding remarks	183

9	A CDM Project of Efficiency Improvement in Power Generation: A Case Study of Chongming Island, Shanghai	189
9.1	Introduction	189
9.2	Evaluation framework	191
9.3	Project scenarios	195
9.4	Costs and benefits of CDM scenarios	200
9.5	Distributional impacts of the CDM scenarios	201
9.6	Conclusion	205
10	A CDM Project of Methane Recovery from Livestock: A Case Study in Changde, Hunan Province	207
10.1	Introduction	207
10.2	A household survey	217
10.3	Socio-economic analysis of a household CDM project	219
10.4	Cost-benefit analysis for a household CDM project	224
10.5	Cost-benefit analysis for a cattle ranch CDM project	228
10.6	Concluding remarks	234
	Concluding Remarks	237
	Index	241

Contributors

Dr. FUJIKAWA, Kiyoshi (Ch5, Ch8)

Professor, Graduate School of International Development, Nagoya University, Japan.

Ph.D. in Economics (Kobe University).

Areas of specialization: Economic statistics and environmental economics.
Main publications: “Productivity Growth in the Chinese Economy by Industry,” *China & World Economy*, 13(5), 56–67, Institute of World Economics and Politics, Chinese Academy of Social Sciences, 2005 (with T. Watanabe).

“Input Output Decomposition Analysis of Sectorial Price Gaps between Japan and China,” *Economics Systems Analysis* (14), 59–79, 2002 (with C. Milana).

Dr. HAYASHI, Tadashi (Ch1, Ch6)

Associate Professor, School of Environmental Science, The University of Shiga Prefecture, Japan.

Ph.D. in Economics (Kyoto University).

Area of specialization: Environmental economics.

Main publication: “Foreign Direct Investment and North-South Environmental Problem,” *The Economic Journal of Takasaki City University of Economics*, 48(3), 107–116, 2006.

Dr. INADA, Yoshihisa (Ch6, Ch7, Ch10)

Professor, Faculty of Economics, Konan University, Japan.

Ph.D. in Economics (Kobe University).

Areas of specialization: Applied econometrics and environmental economics.

Main publications: “High Frequency Model vs. Consensus Forecast,” in S. Ichimura and L.R. Klein (eds.) *Macroeconometric Modeling of Japan*, 393–409, World Scientific, 2010.

“A High-Frequency Forecasting Model and Its Application to the Japanese Economy,” in L.R. Klein (ed.) *The Making of National Economic Forecasts*, 172–197, Edward Elgar, 2008.

Dr. KIM, Seonghee (Ch9)

Researcher, Global Environment & Sustainable Development Unit, Institute of Energy Economics, Japan.

Ph.D. in Economics (Kyoto University).

Areas of specialization: Environmental economics and energy policy.

Main publications: “Sectoral Approaches—Concept and Application,” *IEEJ Energy Journal*, 3(3), 1–28, 2008 (with H. Kudo).

“Analysis of Emissions Allowances Trading Market of Acid Rain Program,” *The Research and Study*, 35, Kyoto University Economic Society, 29–41, 2007.

Mr. KONISHI, Masaru (Ch9)

Senior Coordinator, Corporate Environmental Affairs Division, Panasonic Corp., Japan.

Master of Global Environmental Studies (Kyoto University).

Area of specialization: Environmental economics.

Dr. KUSUBE, Takasei (Ch10)

Assistant Professor, Faculty of Bioresources and Environmental Sciences, Ishikawa Prefectural University, Japan.

Ph.D. in Engineering (Kyoto University).

Area of specialization: Environmental system engineering.

Main publications: “Evaluation of Organic Recycling Systems—The Rainbow Plan Case,” *Journal of the Japan Society Waste Management Experts*, 16(5), 409–418, 2005 (with T. Hosono, K. Ueta and M. Naito).

“Trends of Food Recycling,” *Waste Management Research*, 18(2), 120–128, 2007 (with H. Takatsuki).

Dr. MORI, Akihisa (Ch1, Ch4, Concluding Remarks)

Associate Professor, Graduate School of Global Environmental Studies, Kyoto University, Japan.

Ph.D. in Economics (Kyoto University); in Global Environmental Studies (Kyoto University).

Areas of specialization: Environmental and development economics, environmental governance.

Main publications: “How Have Donors Overcome Barriers to Environmental Aid? A Comparison,” *Journal of Environment and Development*, 20 (1), 3–26, 2011.

Democratization, Decentralization and Environmental Governance in East Asia, Kyoto University Press, 2012.

“Beyond Green Growth: Sustainable Development in East Asia,” in R.K. Chung, H.H. Lee and E. Quah (eds.) *Pursuing Green Growth in Asia and the Pacific*, Cengage Learning , 275–300, 2010 (with K. Ueta).

Dr. NA, Sung-In (Ch2, Ch5, Ch8, Concluding Remarks)

Professor, Faculty of Human Environmental Studies, Hiroshima Shudo University, Japan.

Ph.D. in Economics (Kyoto University).

Areas of specialization: Environmental economics and environmental policy.

Main publications: “E-Waste Recycling Systems and Sound Circulative Economies in East Asia: A Comparative Analysis of Systems in Japan, South Korea, China and Taiwan,” *Sustainability*, 2, 1632–1644, 2010, (with Soo-Cheol Lee).

“The Republic of Korea: Growing Awareness at the Domestic Level,” in Yasuko Kameyama et al., *Climate Change in Asia: Prospective on the Future Climate Regime*, 132–148, 2008.

Dr. NAKADA, Minoru (Ch3)

Associate Professor, Graduate School of Environmental Studies, Nagoya University, Japan.

Ph.D. in Economics (Kyoto University).

Areas of specialization: Environmental and resource economics, economic growth.

Main publications: “Environmental Tax Reform and Growth: Income Tax Cuts or Profits Tax Reduction,” *Environmental and Resource Economics*, forthcoming.

“Deregulation in an Energy Market and Its Impact on R&D for Low-carbon Energy Technology,” *Resource and Energy Economics*, 27, 306–320, 2005.

Dr. NISHIKI, Mari (Ch2)

Researcher, Japanese embassy in Germany.

Ph.D. in environmental management (Kyoto University).

Area of specialization: Environmental policy.

Mr. SHIMODA, Mitsuru (Ch7, Ch10)

Chief Researcher, Applied Research Institute, Inc, Japan.

Master in Economics (Tezukayama University).

Areas of specialization: Macro-econometric model and input-output analysis.

Main publication: “A Structure of International Division of Labor in the Asia-Pacific Region: An Empirical Study Using IDE International IO Tables,” *Konan Economic Papers*, 46(3), 1–34, 2005 (with K. Fujikawa and T. Watanabe).

Dr. UETA, Kazuhiro (Introduction, Ch2, Ch3, Concluding Remarks)

Professor, Graduate School of Economics and Graduate School of Global Environmental Studies, Kyoto University.

Ph.D. in Economics (Kyoto University), Engineering (Osaka University).

Areas of specialization: Multi-level environmental governance for sustainable development, environmental economics and public finance.

Main publications: “Measuring Future Dynamics of Genuine Saving with Changes of Population and Technology: Application of an Integrating Assessment Model,” *Environment, Development and Sustainability*, Vol. 13, No. 4, pp. 703–725, 2011 (with K. Tokimatsu, R. Yamaguchi, M. Sato, R. Yasuoka, M. Nishio).

“Capital Depreciation and Waste Accumulation in Capital-Resource Economies,” *Applied Economic Letters*, Vol. 18, No. 6, pp. 519–522, 2011 (with R. Yamaguchi).
